

Fully Automatic Ferrite Winding Machine SKR-DGY.

Application:

Active RFID antenna applications, Automotive, remote central locking system, Tyre pressure signal etc...

Main features:

- Servo Motor driven spindle and traverse axis.
- Large touch screen machine operation and control, simplifying user interface.
- Automatic start and finish lead connection to the component.
- Component load line: via vibration bowl feeder
- Automatic unload feature using mechanical arm with vacuum pickup
- Fully automated process of loading part, wire-clamp and cutting, connection (welding / bonding) to part, winding, and unload.
- Simplified programming with teach-in programming system.

We aim to be much more than a machinery supplier. Our team has a vast range of winding experience and is able to offer help and advice on all aspects of coil winding, from tooling design to machine choice and set-up.
