

WH-SK1 HAND TWIST TOOL.

Specification

- Features**
- This useful tool twists wire loops for taps, and skeins lead ends for safety in wire termination. It also reduces open circuit problems with wire endings.
 - It is simple and easy to use and indispensable in the winding shop.
 - It fits neatly in the palm of the hand.
 - A single squeeze of the trigger produces a multiple of twists in the wire loop.
 - The operator can squeeze the trigger as many times as is required and, unlike electric versions, it is virtually impossible to under or over twist the wire.
 - This new version is made from tough moulded plastic and is around half the weight of previous die cast versions.

- Application** Skeining of wire ends
- Power supply** N/A
- Weight** Approx. 130 grams
- Dimensions** 120 L * 80 W * 25 H

We aim to be much more than a machinery supplier. Our team has a vast range of winding experience and is able to offer help and advice on all aspects of coil winding, from tooling design to machine choice and set-up.
